

Versatile and result-driven Lead Frontend Engineer with over 10+ years of experience of building scalable and high-performance web applications. Passionate about creating efficient, maintainable software that enhances user experience. Specialized in architecting frontend and backend systems, building in-house frameworks, and optimizing performance. Known for mentoring teams, improving processes, and solving complex problems with creative solutions. Adept at driving technical innovation, streamlining workflows, and leading large-scale development efforts.

Core Technologies

- **Programming Languages** : JavaScript (ES6+) | TypeScript | C/C++ | Python | Go
- **Frameworks** : Next.js | React.js | Node.js | Electron.js | Redux | React-Query | Formik
- **Performance & Optimization** : Rendering Efficiency | Bundle Optimization
- **Cloud Native** : AWS | Docker | Jenkins | GitHub | Container native workflows

Professional Experiences

ORYXLABS (EDGE Group), Abu Dhabi, UAE

Jan 2020 - Present

Designation : Technical Lead

Roles & Responsibilities : Leading frontend architecture efforts for cybersecurity applications, ensuring high performance, scalability, and maintainability while enhancing developer experience.

- **Developed a Cybersecurity Visualization Platform**, enabling real-time cyber threat monitoring and assessment using Cytoscape.js, REST, and WebSockets, significantly optimizing rendering performance.
- **Built an in-house Design System** & Component Library, establishing a unified design language across multiple projects, improving development speed and consistency.
- **Led the Development** of a Compliance Assessment Platform, taking it from proof-of-concept to an enterprise solution in an agile environment.
- **Refactored a Monolithic React Application**, introducing modular patterns and a micro-frontend approach, reducing technical debt and improving maintainability.
- **Designed Interactive Dashboards** using Highcharts and ag-Grid, enabling data-driven decision-making through intuitive visualizations.
- **Introduced a Micro-Frontend Architecture**, allowing multiple teams to work independently while improving scalability and maintainability.
- **Implemented Developer-Centric Tooling**, including Vite, Linters, CI/CD Pipelines, and automated testing, fostering a culture of high-quality code and rapid iteration.

Brillio Inc.

Nov 2018 - Jan 2020

Designation : Technical Specialist

Roles & Responsibilities : Developed intelligent property analytics solutions and real-time data applications to transform real estate insights into actionable data.

- **Engineered a Property Alert Platform**, handling millions of data points efficiently and delivering instant alerts with real-time analytics.
- **Developed Scalable React & Node.js Applications**, improving user experience through optimized rendering and responsive UI frameworks.
- **Automated Infrastructure Operations**, introducing self-healing CI/CD pipelines that streamlined deployment workflows and reduced downtime.
- **Optimized Frontend Performance**, improving rendering efficiency and minimizing latency, ensuring a smooth user experience.

Inventys Pte Ltd, Singapore

Oct 2013 - Nov 2018

Designation : Senior Software Engineer

Roles & Responsibilities : Researched and developed next-gen automation, machine learning, and distributed systems, delivering innovative solutions across various industries.

- **Designed and Developed BPMN Modeling tools** using React and Node.js, enabling intuitive process automation and workflow visualization.
- **Built a Document Scanning System** leveraging TensorFlow.js, significantly enhancing document digitization accuracy and processing speeds.
- **Developed Automation Dashboards & RPA Components** in C++ and C#, improving real-time monitoring and system control.
- **Architected Distributed Automation Engines**, simplifying complex enterprise workflows and enhancing system reliability.
- **Led Research and Development** on Emerging Technologies, prototyping and innovating solutions for future-ready applications.

Education

- PG-Diploma in System Software Development – CDAC, Bangalore, 2013
- B.Tech in Computer Science and Engineering – Uttar Pradesh Technical University (2008 - 2012)

Achievements and Certifications

- Foundations of User Experience (UX) Design - Google
- Programming with Google Go Specialization - Coursera
- Advanced React - Meta
- Microsoft Certified HTML5, CSS3, and JavaScript Specialist
- Oracle Certified JAVA SE 6 Programmer
